Custom apps

[Use cases](#)[Create an app](#)

Developing an app

[Use cases](#)[Webhooks](#)[Create an app](#)[Install an app](#)[Submit an app](#)[Subscription and billing](#)

Webhooks allow developers to build apps that receive near-real-time information about events that happen in ePages shops. Instead of making constant API calls to check for specific changes on the shop, you can register webhooks. For more information about webhooks and how to use them, [read here](#).

The following webhook resources are available:

POST	/ {shopId} /webhooks	ePages 6	ePages Now
GET	/ {shopId} /webhooks / {webhookId}	ePages 6	ePages Now
POST	/ {shopId} /webhooks / {webhookId}	ePages 6	ePages Now
DELETE	/ {shopId} /webhooks / {webhookId}	ePages 6	ePages Now
